Vegetable Seeds

AND Sweet Peas

INCLUDING

NOVELTIES FOR 1901

W. ATLEE BURPEE & CO., PHILADELPHIA, U.S.A.

A Field of JERSEY WAKEFIELD CABBAGE,—from a Photograph

GROWN EXCLUSIVELY FROM BURPEE'S "BEST SEEDS THAT GROW"

"READY FOR THE POST OFFICE,"—in front of the new Burpee Building.

The above engraving, from a photograph taken in January, represents a wagon-load of mail sacks, containing more than twenty thousand copies of "BURPEE'S FARM ANNUAL." It is published here to call attention of merchants handling BURPEE'S SEEDS to the fact that

The Special "Quarter-Century" Edition of BURPEE'S FARM ANNUAL FOR 1901 will be a book of more than two hundred pages.

It will be Entirely New. Every description of Vegetables, Flowers, and Grains has been rewritten, from our latest notes, taken during growth at FORDHOOK FARMS. This has involved months of hard labor, but is of incalculable value as the exact truth it presented in due proportion without the use of "conflicting superlatives." At the head of each species is given Useful Directions for Culture,—also entirely rewritten specially for this "QUARTER-CENTURY" Edition.

A Record of Horticultural Progress during the last quarter of the century just closed is printed in the first "form" on enameled paper, and enlivened by photogravures of our trials and crops at FORDHOOK FARMS,—the most complete trial grounds in America.

The Color-Work promises to be particularly fine. There are four colored plates, painted from nature, of NOVELTIES in Vegetables and Flowers; while the cover (in ten colors and gold) is very attractive.

This Catalogue is, of course, altogether too costly for free distribution and will be mailed only upon receipt of ten cents,—which is considerably less than actual cost per copy to us. We are quite sure that all intelligent planters who take an active interest in their gardens will consider it fully worth a dollar.

Now We Purpose to treat our wholesale customers liberally and shall supply these books at \$5.00 per 100 copies,—sent by freight or express. This is, of course, with the understanding that they will not be sold at less than our advertised price—ten cents per copy. We shall decline all orders EXCEPT from dealers who make a specialty of handling BURPEE'S SEEDS. Others must pay the retail price of ten cents per copy.

We shall publish also for 1901

An Interesting "Business Catalogue" of Ninety Pages

For Free Distribution. This catalogue will prove a "good salesman" and will be supplied to dealers FREE,—in numbers proportioned to size of order.

Please Write Soon just how many copies you will require of each catalogue. The "Business Catalogue" is bound in handsome lithograph covers, and will thoroughly satisfy your customers who may not want to part with a dime for the large "Quarter-Century" catalogue.

W. ATLEE BURPEE & CO., Philadelphia, Pa.

ADVANCE PRICES FOR 1901

PHILADELPHIA, October 19, 1900.

To the Trade:

Being an "exclusively mail-order house" we **employ no travelers**, even at wholesale. Hence, we issue this preliminary price-list that dealers generally may know the present values of seeds, and those who desire to do so can place **early orders**.

It is always profitable, wherever possible, to order early, as we **guarantee against any decline in prices**. On many articles prices are likely to advance, **but** should any be quoted lower in our general Wholesale Catalogue (to be issued in January, 1901), we shall give all dealers who have placed orders (even if shipped) the advantage of such reductions.

As we are not represented "on the road," it might be well to state that **we will not be undersold** by any first-class house handling equal quality of strictly **HIGH-GRADE SEEDS**. The prices herein printed have been fixed carefully, but are, of course, subject to changes without notice. While we are bound for quantities only so far as orders are accepted in writing, yet on many varieties, in large lots, we are prepared to quote **SPECIAL PRICES by letter or telegram**.

In our mutual interests we request, therefore, that dealers who appreciate **QUALITY IN SEEDS** will kindly mail us a list of their requirements for pricing at any time,—rather than allow themselves to purchase from doubtful sources simply because the prices offered are "lower."

We do not carry "two stocks," but supply at wholesale the same quality of thoroughly tested **Proved Seeds** which have resulted in building, in twenty-five years, what is acknowledged to-day the largest mail-order seed business in the world.

Trusting to hear from you at your convenience, we remain,

Very truly yours,

CITY WAREHOUSE:

475 and 477 North Fifth St.,
476 and 478 York Avenue.

PHILADELPHIA, PA.

SEED GARDENS and Trial Grounds at FORDHOOK FARMS, Bucks County, Pa.

BURPEE, Philadelphia,

Is Our Registered Cable Address.

All foreign customers are requested to advise us of their **shortest cable address**. Customers in America who wish to telegraph will also, occasionally, find it useful to use the following additional code. Please note the **code-words** below that would be used in our **reply**, either by cable or telegram.

FOR OFFERS AND INQUIRIES.

CODE-WORD.	TRANSLATION.
<i>Daubling</i>	Telegraph your lowest prices for
<i>Dean</i>	Mail your lowest prices for
<i>Decoy</i>	Mail your lowest prices for, and send samples.
<i>Defend</i>	Telegraph when goods can be shipped.
<i>Defend</i>	Advise immediately by mail how soon goods will be shipped.
<i>Deform</i>	Can you offer for acceptance by mail
<i>Deject</i>	Can you offer any? If so, telegraph prices.
<i>Delude</i>	Can you offer any? If so, mail prices.
<i>Derange</i>	{ Telegraph quantity (or quantities) you can offer of following, together with price (or prices).
<i>Descend</i>	{ State by letter quantity (or quantities) you can offer of following, together with price (or prices).

Code for positive ORDERS.

<i>Dargie</i>	Send immediately by <i>express</i> following seeds at catalogue prices.
<i>Darken</i>	Send immediately by <i>freight</i> following seeds at catalogue prices.
<i>Darnel</i>	Send immediately by <i>mail</i> following seeds at catalogue prices.
<i>Dare</i>	Send immediately the following by <i>freight</i> , per special quotations.
<i>Dared</i>	Send immediately by <i>express</i> the following, per special quotations.
<i>Darling</i>	Send immediately by <i>mail</i> the following, per special quotations.
<i>Dasher</i>	{ Send at once following ; let the other seeds follow as quickly as possible.
<i>Dashing</i>	{ Have you shipped our order? If not, increase if possible our order for to pounds (bushels).

Code-words that will be used in OUR ANSWERS.

<i>Dab</i>	{ In reply to your telegram, we quote for immediate acceptance upon our usual terms for special quotations—three months, or privilege of discount at one and a half per cent. for remittance within ten days of date of invoice—the varieties named below, provided they are unsold upon receipt of your order.
<i>Dacite</i>	We accept your order for
<i>Dagger</i>	We accept your order for, and shall ship at once.
<i>Dainty</i>	We accept your order for, and shall ship as directed.
<i>Dale</i>	We offer you for immediate telegraph or cable acceptance only.
<i>Dame</i>	{ Offer you for immediate telegraph or cable acceptance only each of
<i>Damsel</i>	We offer you for immediate acceptance, subject to being unsold.
<i>Dance</i>	We accept your offer and shall ship as directed.
<i>Dapper</i>	Cannot accept your order for

All Foreign Orders

are invoiced at the **lowest prices** prevailing upon **date of shipment**. In no case (except on Potatoes and farm seeds, subject to fluctuations) will prices be charged higher than quoted herein, until January, 1901, while in **case of decline** in any lines our foreign customers (who, of course, cannot be kept so well posted in the value of American seeds) will receive full advantage of any **lower prices** that we may be quoting.

Our export trade is increasing every year, and dealers, even in the most distant countries, who intrust their orders to us, can rely upon the same close attention and equally the **most favorable prices** that we are making at the same time, for the same quality and quantity, to American seedsmen.

Terms of Credit.—To regular customers and well-known houses of established credit, all bills bought from this catalogue are due June 1st, without regard to date of purchase.

 Bills purchased on special quotations, made by letter, are due three months from date of invoice, or subject to a discount of one and a half per cent. for cash within ten days of date of invoice.

 Unknown correspondents desiring credit are requested to give satisfactory reference in Philadelphia or New York.

Cash Discount.—We allow a discount of **Five Per Cent.** on orders accompanied by a cash remittance, and also on all bills (at catalogue prices) paid within ten days from date of invoice.

The Prices Quoted are those ruling at this date. We expect to adhere to them until the issue of our January catalogue, except where important changes compel us to advance or reduce our prices, when we shall be governed by the market. **10 lbs. and more will be supplied at the rates per 100 lbs.;** $\frac{1}{2}$ lb and $\frac{1}{4}$ bush. at pound and bushel rates; but *smaller quantities will be charged at a higher rate.*

NO CHARGE for Packing or Cartage.—Bags and boxes are charged *at Cost.* After delivering to forwarders in **good order** (as shown by Bill of Lading) our responsibility ceases. **Insurance** will be effected only when so directed.

SEALED PACKAGES.—We make no charge for sealing **pounds, pecks, or bushels**, but, at the low bulk prices quoted herein, we shall charge for putting up in smaller sealed packages, when so ordered, as follows:

In Ounces.—One cent per ounce.

In Quarter-Pounds, Pints, and Quarts.—Two cents for each package.

In Two-Quarts and Four-Quarts.—A charge of three cents per package.

BURPEE'S SEEDS are sold in any quantity, but only under seal. They are always Genuine as dated,—if seal is unbroken.

About Warranted Seeds.

There has been considerable discussion in the trade papers the last few years about warranted seeds, and several seedsmen have criticised the warranty which we have given always,—only to the amount actually paid for the seed. With other reputable seedsmen, who insist upon the usual “disclaimer,” we agree *in so far* that it would be little short of quackery to warrant any seeds invariably to produce good crops. Success is sometimes beyond human control. Under adverse conditions even the best seeds may fail.

We maintain, however, that a Seedsman should know thoroughly the seeds he sells, and after using every possible safeguard, in case of failure from any fault of the seed, should refund the price paid. Further responsibility than this it is impossible to assume. Such a guaranty, however, shows confidence on part of the Seedsman that he is sending out only first-class seeds, and insures the careful co-operation of his employees.

It is necessary, of course, that samples be tested of every lot of seeds, not only for vitality (for even “weed seeds grow”), but also for genuineness and quality of strain. Our complete system of field trials at FORDHOOK FARMS (more than seven thousand in 1900) is the most extensive in America, while with our constant watchfulness in filling orders at our city warehouse the chance of mistakes is reduced to the minimum. Should any mistake occur, however, as would be shown by comparison of samples of the same lot tested in our Trial Grounds, we are prompt to refund the price paid. While this does not compensate for any contingent loss, yet it proves that we have more than usual confidence in the thorough care constantly exercised by us in growing and selling

The Best and Only the Best Seeds that Grow.

Burpee's Vegetable Seeds.

TEN POUNDS OR MORE WILL BE CHARGED AT 100-POUND RATES.

This list cancels all previous quotations.

A Telegraphic Cipher (or Cable Code) is attached to each variety, by which orders can be wired at little expense,—using also our code for weights and measures as given on pages 2 and 3. For example:

Darken Pelew Balcony would mean: Send immediately, by fast freight, forty bushels of BURPEE'S STRINGLESS GREEN-POD BEANS at catalogue price.

Dargie Arad Cage would mean: Send immediately, by express, ten pounds of best select JERSEY WAKEFIELD CABBAGE at catalogue price.

Darnel Amoy Olden would mean: Send immediately, by mail, three pounds Connecticut-grown seed of SOUTHPORT WHITE GLOBE ONION.

Telegrams should be addressed,

W. ATLEE BURPEE & CO., Philadelphia.

Our CABLE ADDRESS is: **BURPEE, Philadelphia.**

BURPEE'S "STRINGLESS" GREEN-POD BUSH BEAN

is now acknowledged by all American seedsmen to be the earliest and best of all green-pod dwarf beans. Its popularity with canners and market gardeners, as well as private planters, is already so well established that last spring there was not one-tenth enough of the true seed to supply the demand. This year we hope to have sufficient for all early orders.

It is almost equally popular in England, where, unfortunately (as is so often the case with American novelties), it has been widely advertised under two other names.

Burpee's BEST-EARLY Cauliflower. Named and introduced by us in 1887, this grand variety has proved to be, as claimed, the **BEST-EARLY Cauliflower** in cultivation. It has attained its present perfection after years' intelligent selection, and is remarkable both for its *extra earliness* and *certainty to head*. In these two important features no other cauliflower can equal it. We would also recommend the new "**Burpee's Dry-Weather.**"

About LETTUCE Seed. Practically all the lettuce seed sold in America is raised in California, but, unfortunately, the demand for “cheap” seed has compelled the majority of growers to produce seed from plants grown so closely together that they have no opportunity to form well-developed heads; nor can these crops be properly “rogued.” Such seed is not to be compared with BURPEE'S!

LETTUCE,—Cutting Varieties.

Early Nutmeg.....	<i>Mallow</i>	30 25 00

Two Specimens of BURPEE'S NETTED GEMS. Engraved from a Photograph.

The Famous "Rocky Ford" Melon is the "Netted Gem" introduced exclusively by us in 1881.

For impartial testimony of this fact (so well known to all seedsmen willing to admit the actual truth), we would refer merchants to pages 12 and 13 of BURPEE'S FARM ANNUAL FOR 1900, and also to pages 22, 23 and 55 of BURPEE'S "BLUE LIST."

Our strain is **extra fine**. We are quite sure it is altogether unsurpassed—the very **best seed** in the market to-day of the now famous "ROCKY FORD" Melon. If you are offered a lower price, do not be tempted to handle inferior seed of this famous melon, but write to us, stating quantity required, for **special quotations on large lots**.

We tested **every strain** again the past season in our extensive South Jersey Trial Grounds, and know positively that "**ours is the best**"; while having grown large areas, we are prepared to meet all legitimate competition in price. Our trials of the so-called "ROCKY FORD" or NETTED GEM Melons, the past season, **numbered more than one hundred samples** in actual field trials.

We make a Specialty of ONION SEED, and have the largest stock of New Crop Seed in the East.

Special Prices Quoted to Buyers of large Quantities

If you are led by low prices to purchase Onion Seed from unknown or doubtful sources, you should test the vitality before selling same to your customers. Compare such tests with the percentage of growth of New Seed purchased direct from us or from other growers whom you know to be trustworthy, and such germination tests alone will show that the lowest priced Onion Seed is NOT always the cheapest. We will not be undersold on first-class High-grade Seed.

All "Hand-Picked." Again this year, as usual, we shall probably be undersold by other dealers in Peas. Aside from difference in quality of strains and care in roguing crops, it is a fact that most of these lower-priced peas are only milled, while we handle none but the best "hand-picked" seed. Compare samples!

About Squashes.

Besides FORDHOOK FARMS we conduct extensive trial grounds in the light sandy soil of Southern New Jersey. Here are made annually the most extensive trials of all vine seeds.

Some years ago we found that even the best strains of squashes could be further improved. To-day, while not yet thoroughly satisfied that we have come sufficiently near to "perfection," we are confident that no strains of squashes are more carefully selected than those sold by us. Our strains of the *three Hubbards*, *Fordhook*, and the *Patty-pan Squashes* are particularly fine.

We Devote Special Attention to Growing TOMATOES.

Our Seed is Saved only from Selected Strains.

Tomatoes are a leading specialty with us. We have introduced some of the finest varieties now in cultivation, but constantly exercise the greatest care to keep our strains, even of the older varieties, up to the highest possible standard. Our seed is all saved from fruits grown especially for seed, and is not cheap seed from canneries, of inferior germinating power and more than doubtful purity. Tomato Seed is an important crop on our own farms in Bucks County, Pennsylvania, and all inferior specimens are discarded before seed is saved.

By the most careful continued selection we are enabled to offer strains which produce uniformly smooth fruits, of the most solidly fleshy character and fine quality. These strains have been developed, however, at the expense of the quantity of seed produced, and the price of this high-grade seed is necessarily higher than that at which inferior strains can be sold.

CHOICEST FLOWER SEEDS.

We make a specialty of the **Choicest Flower Seeds** which we grow extensively, both at FORDHOOK FARMS and with our private growers in America. We have **extra fine stocks**, particularly of ASTERS,—BALSAMS,—BEGONIAS,—COLEUS,—COSMOS,—GLOXINIAs,—Giant Hybrid HELIOTROPE,—Tall and Dwarf NASTURTIUMS (superior to imported seed),—Largest-Flowering PETUNIAS,—PHLOX DRUMMONDII,—SALVIA SPLENDENS, and VERBENA. ☞ We shall be pleased to quote **Special Prices** upon receipt of list of your requirements, stating varieties and quantities. Or you can send **an open order**, in full confidence that prices will be *very moderate* for quality of seed. ☞ In no case will prices exceed those printed in our last General Wholesale Catalogue.

Complete List of all Known Tall SWEET PEAS.

 Special Low Prices. 

We are acknowledged as **AMERICAN HEADQUARTERS** for Sweet Peas.

 We would refer to our Retail Catalogue for full descriptions of **NOVELTIES** not specially described herein, and would suggest that with the present widespread interest in Sweet Peas it will pay seedsmen generally to offer more of the **NEW SORTS**, as the margin of profit—between retail and the special prices—is greater than on standard varieties.

 We are not bound by these prices after December, and for quantities only so far as engaged. When our general Wholesale Catalogue is issued in January, probably many varieties will be advanced.

	Telegraph Code or Cipher.	Per lb.
* Admiration (Burpee's) . Delicate shade of rosy lavender,	<i>Admiration</i>	\$0 80

* Navy Blue (Burpee's). Largest size ; deep violet-blue,	<i>Navy</i>	90
Novelty. Standard bright orange-rose ; wings light mauve,	<i>Jippo</i>	20
Oddity (Burpee's). Peculiar pale carmine and bright rose,	<i>Joar</i>	20
Orange Prince. Standard orange-salmon ; wings bright pink,	<i>Jobation</i>	20
* Oriental (Burpee's). Suffused bright orange-salmon,	<i>Joblot</i>	30
* Othello. Deep glossy maroon,	<i>Othello</i>	75
Ovid. Rose-pink, margined with deeper rose,	<i>Jocantry</i>	20
Painted Lady. The old pink and white,	<i>Joconde</i>	20
Peach Blossom. Standard salmon-pink ; wings soft pink,	<i>Jocose</i>	20
* Pink Friar (Burpee's). Carmine-rose, suffused on silvery white,	<i>Jocular</i>	30
* Prima Donna. A most lovely shade of soft pink,	<i>Jogelour</i>	25
Primrose. Pale primrose-yellow,	<i>Jogge</i>	20
* Prince Edward of York. Standard scarlet ; wings deep rose,	<i>Joinant</i>	25
* Prince of Wales. Bright rose ; self-colored,	<i>Joiner</i>	30
Princess Beatrice. A popular rosy pink,	<i>Joist</i>	20
Princess Louise. Standard rosy pink ; wings lilac-blue,	<i>Jokish</i>	25
Princess May. Light lavender ; flowers small,	<i>Jollyte</i>	25
* Princess of Wales. Striped mauve on white ground,	<i>Jolting</i>	45
Princess Victoria. Standard scarlet ; wings rosy mauve,	<i>Jombre</i>	20
Purple Prince. Standard maroon ; wings purple,	<i>Jonah</i>	20
Purple-Striped. Old and undesirable,	<i>Jondla</i>	20
Queen of England. Pure white ; notched at top of standard,	<i>Jonesia</i>	25
Queen of the Isles. White stripes on bright crimson-scarlet,	<i>Jooming</i>	20
* Queen Victoria. Primrose, overlaid with faint purple,	<i>Joram</i>	30
* Ramona (Burpee's). White, daintily splashed with pale pink,	<i>Jostle</i>	22
Red Riding-Hood. Rosy pink ; standard overlaps wings,	<i>Jotter</i>	22
Rising Sun. Orange and rose, shaded carmine,	<i>Jounce</i>	25
* Royal Robe. Standard delicate pink ; wings blush-pink,	<i>Journal</i>	25
* Royal Rose. Deep rosy pink. (Per 100 lbs. \$27.50),	<i>Journey</i>	30
* Sadie Burpee,—Black-seeded (Eckford's). (100 lbs. \$55.00),	<i>Puritan</i>	60
* Sadie Burpee,—White-seeded (Eckford's). (100 lbs. \$55.00),	<i>Purity</i>	60
* Salopian. The best scarlet, excepting new "Sunproof"	<i>Jovial</i>	25
* Sunproof Salopian (Burpee's). The finest scarlet sweet pea,	<i>Jowl</i>	65
Scarlet-Striped. One of the oldest varieties,	<i>Jowler</i>	20
* Senator. Bright brown and chocolate, striped,	<i>Joyance</i>	20
* Sensation (Burpee's). White, suffused with faint blush,	<i>Juba</i>	25
* Shahzada. Dark maroon, shaded purple,	<i>Jubilar</i>	25
Snapdragon (Burpee's). A white Red Riding-Hood,	<i>Jubilee</i>	75
* Splendid Lilac. Light lilac ; now an "old style" flower,	<i>Jubiter</i>	20
* Splendor. Superb bright rose, shaded crimson,	<i>Judge</i>	20
* Stanley. Rich dark maroon,	<i>Judica</i>	25
* Stella Morse (Burpee's). Rich primrose, flushed pink,	<i>Judicial</i>	25

The varieties marked with an asterisk () produce flowers of good substance and largest size—being of the true *grandiflora* type.

SWEET PEAS,—Continued.

DOUBLE SWEET PEAS. From most carefully selected stock seed, saved only from the best plants bearing double flowers, we offer the following varieties:

Apple Blossom, Butterfly, Duke of Clarence,	White, Waverly, Boreatton,	Lottie Eckford, Captain of the Blues, Bride of Niagara,	Senator, Splendor.
--	---	--	-------------------------------

Each of the above DOUBLE SWEET PEAS, 35 cts. per lb.
Eleven Mixed DOUBLE SWEET PEAS (Cable word—*Xerxes*), 30 cts. per lb.; \$27.50 per 100 lbs.

WHOLESALE AGENTS IN EUROPE.

In order to accommodate the Seed Trade in Europe we have appointed the following well-known firms **Special WHOLESALE AGENTS** for **OUR NEW CUPIDS** in **original sealed packets**; also for **BURPEE'S "MONARCH" BUSH SWEET PEA**—now first offered to the trade.

These houses will supply **these novelties** in our original packets, on the same terms as if the orders were sent direct to us.

Sole Wholesale Agents for Great Britain, Australian Colonies, and India:
Messrs. **HURST & SON**, 152, Houndsditch, London.

Sole Wholesale Agents for France, Belgium, Spain, Portugal, and Italy:
Messrs. **VILMORIN-ANDRIEUX & CO.**, Paris, France.

* **Wholesale Agents for Germany, Holland, Austria, Hungary, Russia, Denmark, Norway, and Sweden:**

Messrs. **DIPPE BROS., HAAGE & SCHMIDT, HENRI METTE, MARTIN GRASHOFF, FREDK. ROEMER, and J. C. SCHMIDT.**

All orders from America (and Foreign Countries not named above) should be addressed to the introducers:

W. ATLEE BURPEE & CO., Philadelphia, Pa.

* In the case of the six wholesale agents named for Germany, Holland, Austria, Russia, Hungary, and Scandinavia, it is expected that seedsmen of these countries will procure their supplies of these novelties from the house with whom they are accustomed to deal.

Four Finest NEW CUPIDS for 1901

Of Surpassing Loveliness; Hardy and Vigorous Growth.

We shall celebrate our "QUARTER-CENTURY" by introducing four of the finest Cupids yet obtained. We are glad to be able to offer all these to the trade, but must insist that they be sold only in our original sealed packets at 15 cts. and 25 cts. each. With the prominent publicity that these will receive next winter and spring, we are sure that you can catalogue no better novelties for 1901. On orders of sufficient size we shall be pleased to print your name and address on the packets, instead of our own, if preferred.

A Plant of APPLE BLOSSOM CUPID,—engraved from a Photograph.

New Dwarf CUPID Sweet Pea,—APPLE BLOSSOM.

To our mind the tall *Apple Blossom Sweet Pea*, though one of the earliest large-flowered productions of Mr. Henry Eckford, has the most charming combination of pink and white shadings of all the tall sweet peas. It is with great pleasure, therefore, that we now announce a true Cupid variety having this exquisite coloring. Naturally in thinking of a pink-and-white Sweet Pea the mind reverts at once to our *Pink Cupid*, which is so wonderfully effective with its masses of bright pink-and-white flowers. The APPLE BLOSSOM CUPID, however, is entirely distinct. The flowers are much larger in size and of finely hooded form, while the pink coloring is very soft in shade and beautifully blended with the silvery-white ground color of the flower.

The flowers are of *grand large size*, beautifully hooded and borne four on a stem. The standard is very large and broad, slightly pointed with edges well rolled, deeply suffused and veined with deep rose on a silvery ground, shading deeper in the center; wings are quite broad, and lie closely about the semi-erect keel, heavily shaded in the center with soft rose which becomes lighter in the heavily rolled edges. A grand companion to *Burpee's Beauty Cupid*. Cable word,—“Apple.”

New Dwarf CUPID Sweet Pea,—“STELLA MORSE.”

This grand new Cupid is identical in rich coloring with the tall *Stella Morse* as introduced by us in 1898, and which is still the most distinctly colored of all the so-called “yellow” Sweet Peas. The flowers of the Cupid strain are distinct from those of the tall parent variety in that they come only two on a stem, but like *Katharine Tracy* the shading is so charming and exquisite that this feature is easily overlooked. The standards are also shorter and broader, making the broadly spreading wings equally prominent with the standard. The whole flower has a closely hooded appearance similar to that of *Burpee's Beauty Cupid*. The standard is very broad and the upper edges are heavily rolled, giving a sharply pointed effect, while the keel is stiffly erect, holding the broad widely spread wings closely to the standard. The ground color is a rich creamy buff, tinted with apricot in the center of the standard, while the inner portion of the wings is delicately shaded with soft rosy carmine. Cable word,—“Stella.”

New Dwarf CUPID Sweet Pea,—Burpee's "ROYALTY."

See Illustration of a Plant on Back Cover.

This beautiful new Cupid resembles the tall *Royal Rose*, one of the very finest self-colored pinks, but the flowers are even *larger* and considerably *deeper in shade*,—hence the new name "ROYALTY."

The flowers are of extra large size, well hooded, and of the finest grandiflora type. The standard is broad but with edges rolled, giving a sharply pointed effect; wings broad and well spread, with edges also heavily rolled. The flowers come generally *four on a stem* and closely set together at the top. They are *most desirable for boutonnières and for designs of cut-flowers*, as this shade of pink is highly esteemed. For borders and bedding purposes the entire set of four new Cupids offered this season will be especially welcomed for the very distinct and highly desirable colorings. They cannot fail to greatly extend the cultivation of these dwarf varieties, which can be grown so successfully even in warm dry locations where the Tall Sweet Peas would fail to bloom satisfactorily. *Cable word*,—"Royalty."

A stem of
"ROYALTY"
CUPID,
Engraved from a
Photograph.

New CUPID Sweet Pea,— CAPTAIN OF THE BLUES

An entirely distinct and charming blending of colors in the Cupid type. It retains all the beauty of the tall *Captain of the Blues*, with the very dwarf growth of the Cupid varieties. The flowers, borne in close clusters of three at the top of a very stiff stout stem, are *larger and finer* than the tall *Captain of the Blues*. The standard is very large and broad, stiffly erect with edges heavily rolled, producing a sharply pointed effect. In color the standard is of a reddish-purple tint heavily suffused with violet in the center portion; wings very large, only partly spread and of a rich violet-purple,—*approaching deep blue* and slightly tinged with rose-pink at the outer edges.

As seen in contrast to the rich dark-green foliage, the mass of flowers has quite an effect of *rich deep blue*. This new variety will be one of the most desirable for bedding and borders, and also for cut-flower work as well, where the shorter stems (as compared with the tall sorts) will admit of their use. *Cable word*,—"Captain."

Liberal Packets. In our "QUARTER-CENTURY" year, in order that the **Four Finest Cupids** for 1901 may become quickly established in popular favor, we shall **increase size of packets**. Instead of *counting* 12 and 24 seeds as formerly, we have arranged scoops to run as nearly as possible **twenty and forty seeds**, respectively in half-size and full packets.

Each of the above is sold only in our original sealed packets.

Regular packets, each containing about forty seeds :

Per pkt. 25 cts. ; 5 pkts. for \$1.00, or \$2.00 per dozen packets.

Wholesale, \$12.50 per 100 packets ; \$100 per 1000 packets.

Five hundred packets supplied at **thousand rates**.

Half-size packets, each containing about twenty seeds :

Per pkt. 15 cts. ; 2 pkts. for 25 cts., or ten packets for \$1.00.

Wholesale, \$7.50 per 100 packets ; \$60.00 per 1000 packets.

Five hundred packets supplied at **thousand rates**.

We Predict that before many years have passed, even those seedsmen who have thoughtlessly condemned CUPIDS because the original WHITE CUPID being more tender and difficult to germinate,—like all *white-seeded* Sweet Peas,—will become enthusiastic admirers of this charming race,—as making **most showy dwarf plants for beds and borders**. Already the several vigorous-growing *hardy black-seeded* varieties, introduced in 1899 and 1900, have done much to redeem the reputation,—proving as they have that in *dry seasons* Cupids bloom most *freely*, even when tall Sweet Peas completely fail.

A Single Plant, engraved from a Photograph, of BURPEE'S PINK CUPID.

The New Dwarf CUPID SWEET PEAS, Including our Three Introductions of 1900.

ALICE ECKFORD CUPID. The blooms are borne in close clusters of three on stiff stems, displaying most attractively the charming blended coloring. The standards are a rich creamy white, suffused or blended with a delicate shading of soft flesh-pink; the wings are silvery white with a faint pink flush in the central portion. The coloring of the entire flower becomes rather deeper, instead of fading, when well opened. The flower is identical, in size, form, and color, with that of the tall *Alice Eckford*, which, while not of the largest size, has been admired so greatly on account of the delicate and harmonious shadings of softly blended tints. The plants grow in the regular dwarf compact form of the *Cupids*, with the dense deep-green foliage, which makes not only a beautiful setting for the profusion of delicate blossoms, but also shades the soil about the roots more effectually than a mulch, and enables the plants to continue in bloom much longer during hot, dry weather than any of the tall-growing sorts. It is a *black-seeded* variety of strong vitality, so that no difficulty need be feared in securing a good stand of plants, even under adverse circumstances, while, like all the *Cupid* varieties, it will bloom much longer and more freely during a hot, dry summer than any of the tall varieties of Sweet Peas.

Wholesale, 40 cts. per lb.; 10 lbs. at 35 cts. per lb.

BOREATTON CUPID. Flowers of good size, fine bold form, and rich dark coloring. Standard quite broad and well spread, of smoothly rounded form, edges slightly reflexed or curving backward; self-colored in a rich wine-brown, with heavy veinings of a still darker shade. It is of beautiful texture and smooth, glossy, satin surface. Wings lie rather closely to the semi-erect keel, spreading in the lower portion, with edges heavily rolled; deep mauve, suffused with rosy purple. Keel heavily striped with rich purple. The plants are always of *true Cupid growth*, dense and spreading.

Wholesale, 90 cts. per lb.; 10 lbs. at 85 cts. per lb.

BURPEE'S PINK CUPID. Burpee's PINK Cupid, introduced in 1898, like the original Cupid, hails from California, and we paid *fifteen hundred dollars cash* for the exclusive ownership when there were only 1060 seeds in existence. It is not a sport from the original White Cupid, but an actual departure from its parent, the tall *Blanche Ferry*. In habit it is strictly a Cupid, spreading from the root, from a foot to eighteen inches around, growing from six to eight inches high, and shooting up stems about eight inches long, which bear, in full bloom at once, from *three to four handsome blossoms*, all borne close to the end of the stem. The standard is wide, not infrequently measuring an inch and a half, and has a distinct shell-shaped appearance. The standard is a bright rose-pink, while the wings are pure white or light pink. Though flowering early, it continues in bloom very late, bearing a profusion of blossoms so thickly as to completely hide the plant. It is *black-seeded*, and grows as easily everywhere as any tall Sweet Pea, while a large bed looks as if the ground were literally strewn with bright-pink rose-buds. The editor of THE FLORISTS' EXCHANGE, in describing a visit to our crop, in New York State, wrote: "We counted 121 stalks in blossom on one plant and an average of three flowers to a stem."

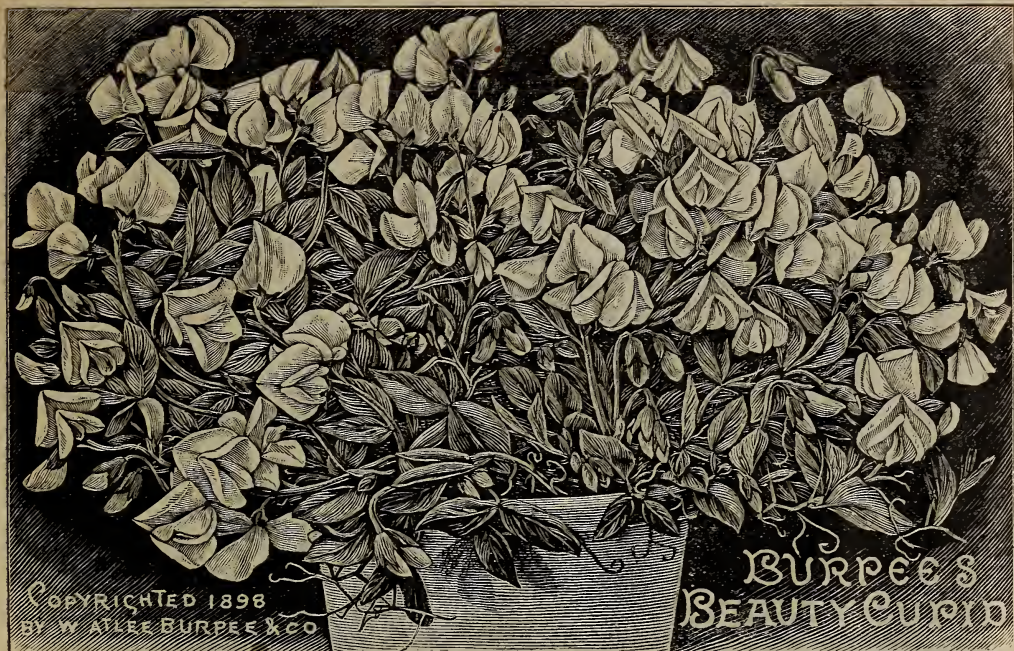

Wholesale, 40 cts. per lb.; 10 lbs. at 35 cts. per lb.

"FIREFLY" CUPID. Like the others, this is, of course, of true Cupid growth—dense and spreading. Flowers of good size and deep, rich shading. Standard quite large, broad and erect, widely spread; of pointed form when fully opened, and of a deep, glowing scarlet. Wings large and curling close to the keel, only moderately spreading, and of a deep, rich rose. The large flowers, borne in clusters of three, have the same dazzling scarlet effect as the tall *Firefly*, and appear even *more brilliant* in the striking contrast to the deep emerald-green foliage. The plants are literally covered with bloom, and, either in a bed in the open garden or as pot-plants, are *almost startling in gorgeous beauty!* Every one who has seen THE FIREFLY CUPID is wildly enthusiastic. It is really impossible in any description to give an adequate idea of the brilliancy and beauty of these little plants, so completely covered with intensely brilliant bloom.

Wholesale, 90 cts. per lb.; 10 lbs. at 85 cts. per lb.

WHITE CUPID. WHITE CUPID flowers pure white; height six inches; habit spreading; too well known to need much description. The flowers are not so liable to fall as when first introduced; excellent for bedding; a very charming companion for the Pink Cupid, and might be used in conjunction with very excellent results.—HENRY ECKFORD.

Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.

New Dwarf Sweet Pea,—Burpee's "BEAUTY CUPID."

BURPEE'S "BEAUTY CUPID."

BURPEE'S BEAUTY CUPID, while being always of the true Cupid type,—growing only six to seven inches high, with deep emerald-green foliage,—bears flowers fully equal in size, form, and substance to the best of the new tall Sweet Peas. The handsome large flowers are borne most profusely all over the plant, in clusters of three, at the top of strong stems. Of unusual breadth, rather pointed at the top, and edges recurved, giving it the deeply hooded effect of *Her Majesty*. The standard is a delicate and yet decided rose-color, lightening to nearly white at the edges, and slightly striped with carmine at the base. The wings are suffused rosy carmine, deepening at the edges. A vigorous grower, it is a wonderfully free bloomer, and, besides its beauty in the garden, promises to be of real value as a commercial flower in the greenhouses.

Wholesale, 45 cts. per lb.; 10 lbs. or more at 40 cts. per lb.

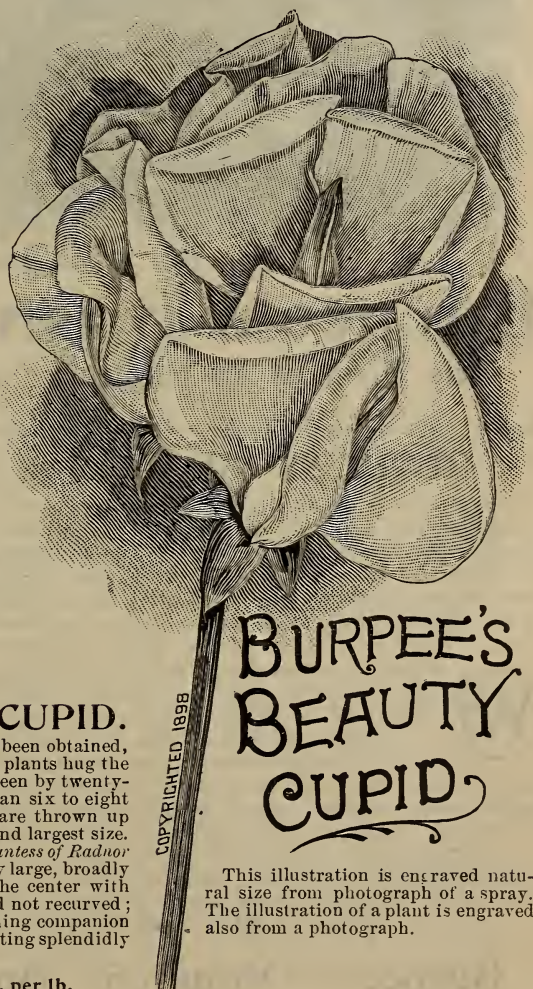

PRIMROSE CUPID. Like all the other Cupids, this is very free-flowering, and the dwarf plants, only six to seven inches high, have that distinct emerald-green foliage which is peculiar to this new race. It is identical with the well-known white CUPID in all respects except coloring. The flowers are of a rich creamy tint, identical with that of the tall *Primrose*. The standard is rather short, but stiffly erect and very broad; wings wide and well expanded.

Wholesale, 40 cts. per lb.; 10 lbs. or more at 35 cts. per lb.

COUNTRESS OF RADNOR CUPID.

In the new Cupids, several of the lavender tints have been obtained, but this is decidedly the best. Of true Cupid type, the plants hug the ground, verbenalike, completely covering a space sixteen by twenty-four inches in diameter, and never growing more than six to eight inches high. From this mat of deep-green foliage are thrown up hundreds of stems of dainty flowers of perfect form and largest size. The flowers are of immense size, larger than the tall *Countess of Radnor* and are borne three and four on a stem. Standard very large, broadly expanded, and of a delicate lavender, suffused in the center with soft rose. Wings unusually broad, widely spread, and not recurved; of a clear, light-lavender shade throughout. A charming companion to the dark beauty of *BOREATON CUPID*, and contrasting splendidly with the intense brilliancy of *FIREFLY CUPID*.

Wholesale, 90 cts. per lb.; 10 lbs. at 85 cts. per lb.

This illustration is engraved natural size from photograph of a spray. The illustration of a plant is engraved also from a photograph.

A Single Plant of the BURPEE'S BUSH SWEET PEA.

Burpee's Bush Sweet Pea.

The First of an Entirely New and Distinct Race.

As other colors are being produced, this original "BUSH" will be known hereafter as
BURPEE'S GRAY FRIAR BUSH SWEET PEA.

BURPEE'S BUSH SWEET PEA grows in perfect bush form, as shown in the illustration. It requires no trellis like the tall Sweet Peas; neither does it hug the ground, verbena-like, as does the *Cupid* race. An average bush grows sixteen to eighteen inches high, by from twelve to fourteen inches wide. One of the largest plants measured was seventeen inches high, and branched so vigorously that it measured twenty-four inches across! All the flowers are borne on top of the plant, and the proper way to treat this new type will be to plant the seed in a row, to make a neat, even hedge, when no supports whatever will be required. Grown as separate, individual plants, the slight support of a light stick should be furnished,—just such as would be required for a dwarf, bushy Marguerite carnation. We predict that this "forerunner of a new race" will beget increased enthusiasm in Sweet Peas.

The flowers, both in form and coloring, are a perfect reproduction of the famous *Gray Friar* introduced by us several years ago. As is well known, this is one of the most beautiful varieties in the entire list of Sweet Peas. Of good size and perfect hooded form, they are of a most beautiful watered purple on white ground, the heavier coloring being on the back of standard. Black-seeded; hardy and vigorous in constitution,—it succeeds well everywhere.

The low price at which we are now able to offer the original BURPEE'S BUSH SWEET PEA should enable seedsmen generally to sell it at **15 cts. per oz. retail** and thus establish quickly the value of this new race for planting in rows. Cable Word,—**"Bush."**

Wholesale, **80 cts. per lb.**; 10 lbs. or more at **75 cts. per lb.**

Burpee's "Monarch" Bush,—see next page.

Burpee's Bush,—“MONARCH”

Sweet Pea

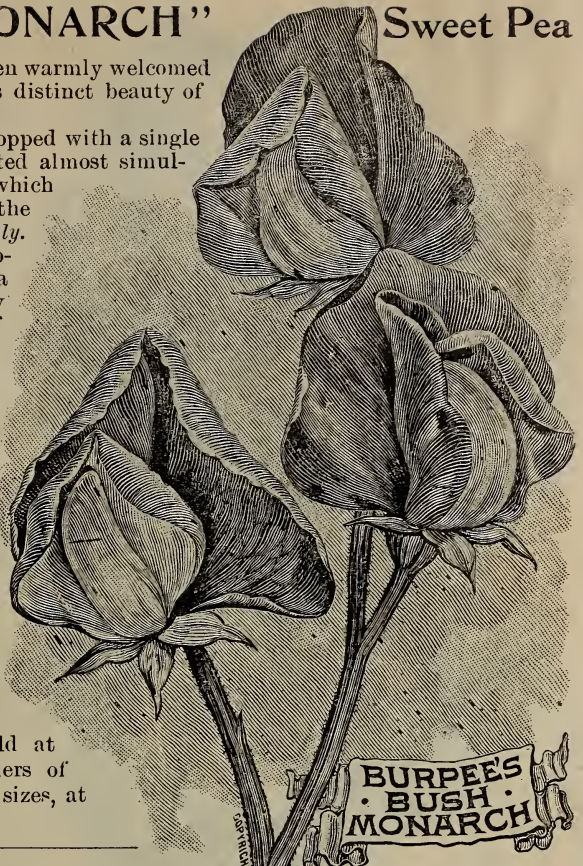

BURPEE'S BUSH SWEET PEA has been warmly welcomed as the first of a new race that possesses distinct beauty of growth.

As in “Cupids,” nature has not stopped with a single variety of this new race, but has created almost simultaneously several varieties, another of which has now yielded sufficient seed to offer the trade, but in sealed packets and ounces only.

BURPEE'S “MONARCH” BUSH produces fine flowers, generally three on a stem, as here illustrated, which exactly resemble in form and coloring those of the well-known tall *Monarch* Sweet Pea. These dark-colored flowers, of a deep bronzy maroon, are most effective in contrast with the light-green foliage. Every plant is of true bush form, growing only sixteen to eighteen inches high and proportionately broad. The stems are closely jointed; the plants branch freely, and the tendrils at the ends of the leaf-stalks attach themselves to the stem, so that the whole plant is maintained in a compact bush-like form, standing erect without any support.

Retail: 10 cts. per pkt.; 25 cts. per ½ oz.; 40 cts. per oz.

Wholesale, these packets are sold at Fifty Per Cent. Discount. In orders of one thousand packages or more of any sizes, at Sixty Per Cent. Discount.

**BURPEE'S
BUSH
MONARCH**

This Spray of Three is illustrated, natural size, from a photograph.

See preceding page for illustration of a plant of this distinct new Bush type.

AN ENGLISH
OPINION OF
BURPEE'S

“BUSH” Sweet Peas.

The New Bush Sweet Pea. This is the first of an entirely new type of this beautiful flower. It forms a perfect bush, and consequently does not require tall sticks.

Neither does it hug the ground, Verbena fashion, like the Cupid race. I purchased a small packet of seed at the beginning of the season, and sowed twelve seeds in an eight-inch pot. In the meantime I thoroughly prepared a trench, for I always find Sweet Peas do better by this method than by sowing on the level ground. Some well decayed manure, with a light dusting of super-phosphate, was well worked in. When the plants were about six inches high they were planted in the trench in a single row, and the result is a perfect mass of bloom, for all the flowers are borne on the top of the plant. I gave them a little necessary support in the way of a few short twigs. The growth is very robust, and one plant quickly forms a bush under two feet high and over one foot through. When grown in this way a very beautiful little hedge is formed which does not take up much room.

The flowers are a beautiful watered purple on white ground, the heavier coloring being on the back of the standard. I shall sow a few seeds this autumn. This new race has a great

future before it, for nothing will look better in the borders than one of these little bushes of Sweet Peas in all the delicate colors which the hybridizer is sure to quickly give us. For small gardens where the tall varieties have been in the way, this is the very thing to give large quantities of flowers for cutting and yet not take up a great deal of room. The way my rows are blooming convinces me that quite as many flowers will be produced on them as on the taller varieties in the course of the season. I would recommend every one to try this splendid introduction next season.—H. V. V., Winchester, in GARDENING ILLUSTRATED, London, September 1, 1900.

Natural-size
Flowers of the
“BURPEE'S BUSH.”

The first of an entirely new and distinct race. See illustration of a plant on the preceding page.

COPY RIGHTED 1898

Burpee's New Sweet Pea,—“ADMIRATION”

This is a most charming and distinct variety. It might be classed almost as a **new color**. It is a refined self-colored flower of a most delicately beautiful pinkish lavender throughout. It is of such a light, delicate shade that one would feel it could be easily soiled; this, however, is not to be feared, as the sweet peas stand boldly erect on the stems and maintain their delicate beauty for days. It has the general characteristics, form, and size of *Coquette*, which is one of its parents. It is equally profuse in flowering, bearing the large handsome flowers three upon a stem, while the vines are always of strong healthy growth.

As of most perfect form and size, “ADMIRATION” will be particularly valuable for cut-flowers. It is the first of a new shade that is sure to become immensely popular.

Wholesale, 80 cts. per lb.; 10 lbs. or more at 75 cts. per lb.

Burpee's New “SUNPROOF” Salopian.

In our crop of *Salopian Sweet Pea* the first year from Eckford's sealed packets there were found three or four plants that did not show any tendency whatever to burn, as is so generally the case with scarlets under our hot summer sun. The seed of these few plants was saved separately and has been carefully worked up until now we offer this

strain as the **best scarlet** in cultivation,—better even than *Eckford's Mars* or *Burpee's Brilliant*. Wholesale, 65 cts. per lb.; 10 lbs. or more at 60 cts. per lb.

The Curious New “SNAPDRAGON” Sweet Pea.

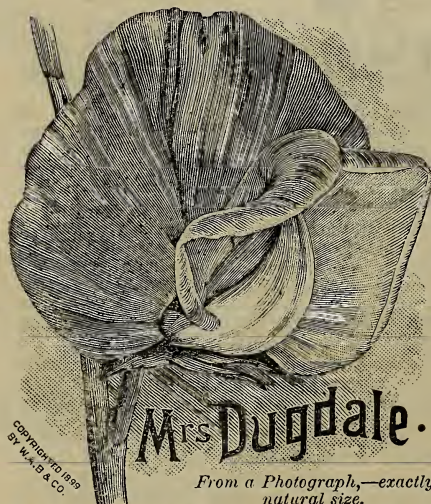

This might be briefly described as a white “*Red Riding-Hood*.” The standard is perfectly formed in the shape of a hood, which overlaps and confines the wings close to the keel. The standard is white, tipped with bright rose at the extreme top. It forms a ball-shaped flower, very similar to a “snapdragon.” The wings are always confined at the top by the overlapping standard, and never protrude above the standard, as is the case with “*Red Riding-Hood*.” The fragrant flowers are borne three

on a stem, and would never be recognized as Sweet Peas except by their fragrance. Wholesale, 75 cts. per lb.; 10 lbs. or more at 70 cts. per lb.

Copyrighted, 1899
by W.A.B. & CO.

Admiration

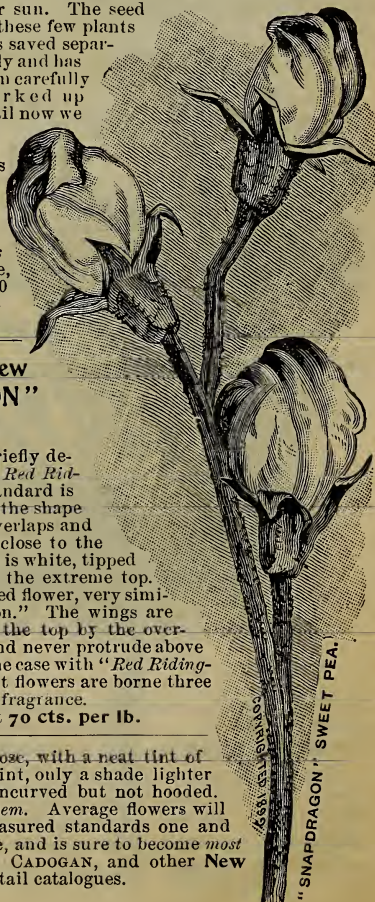

Copyrighted 1899

Mrs. Dugdale.

From a Photograph,—exactly natural size.

on a stem, and would never be recognized as Sweet Peas except by their fragrance. Wholesale, 75 cts. per lb.; 10 lbs. or more at 70 cts. per lb.

MRS. DUGDALE. See illustration.—Light carmine-rose, with a neat tint of primrose; wings are of the same tint, only a shade lighter than the standard; of most perfect form; flowers are shell-shaped, incurved but not hooded. This is one of the largest of Sweet Peas and comes uniformly three to a stem. Average flowers will measure one and a half inches across the standard, while we have measured standards one and five-eighths inches across. It holds its color well, is not inclined to fade, and is sure to become most popular for cut-flowers. For prices of MRS. DUGDALE, COUNTESS CADOGAN, and other New Sweet Peas, see general list. For descriptions we would refer to our retail catalogues.

Copyrighted 1899

“SNAPDRAGON” SWEET PEA.

ECKFORD'S NEW WHITE SWEET PEA, "SADIE BURPEE."

Both Black-Seeded and White-Seeded.

First-Class Award of Merit, ROYAL HORTICULTURAL SOCIETY, 1898.

First-Class Award of Merit, HANLEY HORTICULTURAL SOCIETY, 1898.

First-Class Award of Merit, LEICESTER HORTICULTURAL SOCIETY, 1897.

First-Class Award of Merit, CARDIFF HORTICULTURAL SOCIETY, 1897.

First-Class Award of Merit, EDINBURGH S. H. A., 1897.

SADIE BURPEE,—White-Seeded. Flowers are of the very largest size and purest snowy white, the increased size over *Blanche Burpee* being chiefly shown in the

taller standard, which is also more broadly rounded at top when fully opened. The large flowers come in threes at the summit of a stiff stem and are of firm substance, lasting well when cut. It is the finest as well as the largest pure white for cut-flowers and exhibition purposes. We find in our trials that the vines of the white-seeded *Sadie Burpee* are equally as vigorous as those of the black-seeded strain, while the flowers are of a clearer paper whiteness and quite generally free from the notch or lobe at sides of the standard, occasionally seen in the black-seeded type. Mr. Eckford is fully justified in his claim that this is *absolutely the largest and grandest white sweet pea ever introduced*. Standard very large and broad, stiffly erect, with edges slightly rolled; wings very broad and spreading, held nearly erect by upward curve of the keel. The standard is of firm lasting substance, though of seemingly delicate crystalline texture, with wings of heavier texture.

Wholesale, 60 cts. per lb.; 10 lbs. or more at 55 cts. per lb.

SADIE BURPEE, Black-Seeded

In this grand white Mr. Eckford thought he had produced a black-seeded pure white sweet pea of largest size and purest coloring. A black-seeded white was considered the great *desideratum* by reason of the greater hardness, and nearly all white varieties previously introduced having been of the white-seeded type, this was hailed with great enthusiasm. When the variety was ready to send out, however, it was noted that some of the plants had produced white seed, and we now sell them separately because we find that, while the flowers of the black-seeded type are equally as large as those of the white-seeded strain, they are quite apt to show a delicate pink flush in the standard. This slight variation, however, is amply compensated in the greater hardness of the black seeds, which may be planted as early as other black-seeded sorts, and it is one of the very earliest to bloom among the large-flowered sorts. This black-seeded strain also shows occasionally notches or lobes at sides of the standard. Wholesale, 60 cts. per lb.; 10 lbs. or more at 55 cts. per lb.

BURPEE'S "NAVY BLUE." An entirely distinct color (not tint) from any existing variety of Sweet Pea. General color-effect dark blue; standards brilliant royal purple; wings pure violet; the whole flower elegantly veined in sharp relief. A most vigorous grower. Blooms of approved form, generous size, parchment-like texture, and remarkable substance. Stems usually bear three flowers, occasionally four. When they begin to fade, they assume an antique silver-gray cast, but maintain a stately mien up to the moment the petals fall.

A valuable color innovation. Wholesale, 90 cts. per lb.; 10 lbs. or more at 85 cts. per lb.

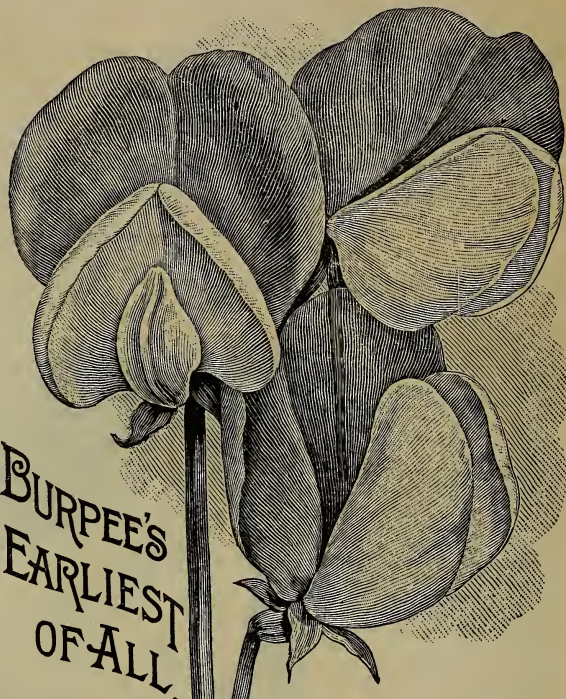

Electrotype, Price \$1.00,—but furnished only with an order for the seed.

SWEET PEA,—BURPEE'S "EARLIEST OF ALL."

Notwithstanding their dwarf habit and neat slender foliage, the plants are of vigorous growth and come into bloom always ten days to two weeks in advance of the Extra Early Blanche Ferry, which has been heretofore a week ahead of all other varieties. The flowers are as large as those of the regular strains of *Blanche Ferry*, and have long stout stems, making them entirely satisfactory for cutting; they are borne in close clusters of three, all facing one way. The standards are a bright, rich pink, while the wings are nearly pure white.

BURPEE'S "EARLIEST OF ALL" is not only the earliest to bloom in open ground, but is also the most desirable for forcing under glass for winter cut-flowers. The dwarf habit of this variety renders it much more easily grown on the benches, admits of closer planting, and from seed sown during the latter part of August blooms may be cut during the holidays, while with the taller varieties no blooms could be had before February or March.

The illustration above was engraved exactly natural size from photograph taken at Fordhook.

Wholesale, 45 cts. per lb.; 10 lbs. at 40 cts. per lb.

Six Comparative Reports.

VENTURA, CAL., Feb. 8, 1900.

W. ATLEE BURPEE & Co., Philadelphia, Pa.

Gentlemen:—Replying to yours of January 29th, requesting me to note differences I have found between the "Extra Early Blanche Ferry" Sweet Pea and "BURPEE'S EARLIEST OF ALL," will say that I have grown the two in comparison in the years 1896, 1897, and 1899, procuring the first-mentioned pea from D. M. Ferry's packets so marked, and have in these years found the "EARLIEST OF ALL" TRUE TO NAME, coming in general bloom fully ten days before the other mentioned pea showed scattering flowers. This pleasing peculiarity of such general early blooming, together with its uniform dwarfish habit, has made my fields of this pea conspicuous to many visitors. I append a record from my diary as follows:

1896.....planted March 6. Full Bloom May 19th.
1897..... " January 26. " " April 14th.
1899..... " February 1. " " " 9th.

There can be no question, I think, of the appropriateness of the name of your pea when properly grown, nor of its described habit.

Yours truly,
THOMAS GOULD.

GILROY, CAL., Feb. 12, 1900.

W. ATLEE BURPEE & Co., Philadelphia, Pa.

Gentlemen:—My attention has been called to the claim that "BURPEE'S EARLIEST OF ALL" Sweet Pea is the same as the *Extra Early Blanche Ferry*. This is far from my two years' experience of these two varieties.

In 1898, when "EARLIEST OF ALL" was introduced, it was by far the earliest blooming Sweet Pea we had; it came into bloom two weeks earlier than *Extra Early Blanche Ferry*. In 1899 my experience of 1898 in regard to early blooming was again verified. Last summer I sowed seed harvested from plants which were sown in spring. The "*Earliest of All*" came into bloom in fall, while *Extra Early Blanche Ferry* did not bloom at all. The "*Earliest of All*" were the only Sweet Pea flowers we had last fall.

Besides this difference in time of flowering, the "EARLIEST OF ALL" is dwarfer in growth, and foliage is more refined and graceful. There is no foundation to the claim that these two varieties are the same.

Yours respectfully,
WALDO ROHNERT.

We have experienced great satisfaction in forcing "BURPEE'S EARLIEST OF ALL SWEET PEAS." The bed is a mass of color and this is a house where other varieties failed to bloom at all.

BOLLET & HORNADAY,
Ponca City, Oklahoma.

WASHINGTON, D. C., Feb. 5, 1900.

W. ATLEE BURPEE & Co., Philadelphia, Pa.

Gentlemen:—We are more than pleased to testify to "BURPEE'S EARLIEST OF ALL" Sweet Peas. The variety blooms under glass fully ten days earlier than any *Extra Blanche Ferry* we have ever used, and those we have used were direct from the Western originators.

Very truly yours,
AMERICAN ROSE Co.

MOORESTOWN, N. J., Feb. 3, 1900.

W. ATLEE BURPEE & Co., Philadelphia, Pa.

Dear Sirs:—As to the BURPEE'S EARLIEST PEA I can say: Your claims for it are fully borne out by my experience. It is dwarfer, bears earlier, and is truer to type than the *Extra Early Blanche Ferry*.

Yours very truly,
EDWARD HARRIS.

MISS ELLA INSLEY, Naduet, N. Y., Feb. 14, 1900, writes:—I planted your EARLIEST OF ALL SWEET PEAS in my greenhouses about the middle of August last, under different conditions. They began to flower about November 25th, and have continued to bloom steadily ever since. I planted a few *Extra Early Blanche Ferry* about a week later under conditions not quite so favorable, and they have not bloomed, but are just beginning to show buds.

The "EARLIEST OF ALL" produces the flowers with long stems; the color of the flower is brighter and deeper than in the *Blanche Ferry*, while the flowers are more lasting. When they fade they do not have a purple cast, but a soft pink.

TRIALS OF CABBAGE, KALE, KOHL-RABI, BRUSSELS SPROUTS, AND CAULIFLOWER,
As they appear early in the season, with one of our barns in the distance.

A PORTION OF OUR MELON TRIALS IN SOUTH JERSEY.
